AICE - ASSOCIAZIONE ITALIANA DI INGEGNERIA ECONOMICA Report on activities in 2011

The AICE activities in 2011 have been focused on the preparatory path of the ICEC world congress to be held in Milano in October, 2014 as well as on the formative courses.

As far as the congress is concerned, we are following up the contact with the Bocconi University, the FAST (Federation of Scientific and Technical Associations) and the EXPO 2015. Still we are in a preliminary stage, the real organisation process is due to start by the end of 2012, exactly two year before the event.

As far as formative courses are concerned, we have been suffering with a serious reduction of the activity owing to the minor number of participants, this is probably due to the general economic situation. We are continuing with some in-house courses in some companies and we are planning to start again with our full programme 2012.

To be noted, eventually, that we shall elect a new Board within the end of 2012.

dott. ing. Gianluca di Castri
Esperto in Ingegneria Economica
(certificato AICE – accreditato ICEC)
Presidente
